**Let's sabotage the
Federal camps!**

In the new federal camps 5000 people are expected to be more efficiently isolated, exploited, and finally also deported. In this presentation we want to give an overview of the plans of the Swiss state and some ideas on how to cross these plans. Further we will focus on the systematic exploitation in the prisons and the businesses that profit from it.

Saturday 21st January, 8 pm

Greetings from Brussel

Some remarks on the struggles against repressive structures

While the authorities are still holding the latest round of regularisations, other groups of Sans Papiers are still trying to get documents. During these processes their organizations of resistance start to collapse and some left amateur politicians rest on their laurels. Some individuals decide to take the struggle against a detention camp for immigrants into their own hands. With the intention of making the detention camp a social issue, they see the possibility of encounters in a position of their own choice: direct action and not delegation. Some years later and having made some new experiences, a new movement against maxi prisons is born. In this presentation there will be an overview of the past events, which characterized these moments, the difficulties encountered and what is left of it.
