

# ASK DIFFERENT QUESTIONS

The questions of politicians and their votes do not interest us because they carry the recognition of their rule in itself. Why not make a „totally different“ starting point for our desire, rather than a reality full of fear, competitors, hatred and envy? Do we want a society where people are controlled, isolated, exploited, alienated, criminalized and humiliated?

Surrounded by goods, lifestyle and new technologies in digital continuous noise, such questions seem to suffocate in the spiritual emptiness of everyday life. It is as if someone orchestrates it so we do not dare to question ourselves over the appropriation and self-determination of our lives.

## FOR SOLIDARITY AND A SELF-DETERMINED LIFE WITHOUT PAPERS AND PROPERTY!

Our questions are based on a libertarian and anti-authoritarian sensibility of self-organized solidarity: No one should be imprisoned, dominated and exploited. Everyone should be free to organize their own lives, rather than it being in the hands of government.

However, this requires a permanent break with this life and its constraints. The everyday revolt against all authority, no matter where, is a question of self-determination. Our decision can only be a challenge to the status quo.

*I decide* whether I look away or interfere in inspections and surveillance, as they all restrict us.

*I decide* if I accept ownership or steal, redistribute and share in order to expropriate from those who have more than they need.

*I decide* if I categorize people or simply get to know them in order to live relations on an equal basis.

*I decide* to attack common exploitation in order to appropriate our lives.

NAZIS, DEPORTATION STRUCTURES, RULERS, WAR PROFITEERS,  
AND CAPITALIST RULING STRUCTURES!**
